2.0 HAZARDS IDENTIFICATION

Health Hazard: Liquid is severely irritating to the eyes and may cause irreversible damage. Vapors: causes irritation, tearing and burning sensation. The vapors of many amines cause the eyes to perceive a halo around lights.  
Skin contact may cause moderate injury, reddening, and swelling.  
Chronic, May cause allergic respiratory reactions.  
Chronic, May cause allergic skin reactions.  
Acute, Severe irritant or corrosive if ingested.  
Chronic, May be toxic if swallowed.

Primary Routes of Entry:

Inhalation ............. Severe Irritant  
Skin .................... Corrosive  
Ingestion ............. Severe Irritant; Harmful

Over Exposure Effects:  

Ingestion Overexposure: May be harmful if swallowed. Can cause severe irritation and inflammation of the mouth, throat, and stomach. Severe stomach pains follow with possible loss of consciousness. May lead to serious illness or death.  
Inhalation: Exposure to vapor, mist or liquid can produce severe irritation or burns of the respiratory tract. Severe exposures could result in chemical pneumonia.  
Eyes: Contact with eyes can cause severe damage, including burns and blindness. The severity of the effects depends on the concentration and how soon after exposure the eyes are washed. The vapors of many amines cause the eyes to perceive a halo around lights.  
Skin: Corrosive. Prolonged or repeated contact, even to dilute concentrations, can cause a high degree of tissue damage. Irritation or burns of the skin may be delayed from initial contact. The severity of the tissue damage, depend on the exposure time.
